

Freak Heart-Attack Almost Took My Mom's Life.. But Now She's Even Healthier Than Women Her Age!

If you're under 55 and you have health complications, do NOT ignore this message.

I was away when I got the news from my sister.

My mom was in intensive care and her heart was failing.

I couldn't believe my ears.. I can't remember what happened next after I heard the news.

I just slumped on my chair.. Total mental blackout.

My mom worked hard for us.. too hard. Eventually it led to her downfall.

Ever felt angry and sad at the same time? Angry because someone didn't listen to your advice, but sad because the worst happened.

riinnngg

It was my sister again.

"They got a heartbeat! She's gonna be OK!"

My eyes widen. Thank goodness! They managed to save her!

The Leading Cause of Sickness, Diseases and Cancer..

That ordeal traumatized me.

I started looking for ways to get my mom back to full health. One day, out of nowhere, a friend called me up to share some news with me.

We met for lunch and frankly, it was the most important, life-changing lunch I've ever had.

He told me the leading cause of sickness and diseases in people, and how it can be prevented and cured.

His timing was perfect. He didn't know about my mom's condition and after I told him what happened, his face was in shock.

We've known each other for awhile and news of my mom took him by surprise. He began explaining to me what's actually happening behind the scenes that not many Americans are aware of.

Let me ask you:

- Ever felt like your body is 'slowing down', losing its youthfulness every day?
- ..you get tired way too quickly sometimes?
- ..you still feel groggy and lethargic even after a good night's sleep?
- ..you find it hard to trim that belly down?
- ..your metabolism is not working as it should?
- ..you feel that your body is slowly degenerating day by day?

Are you having allergies, asthma and congestion, frequent colds, headaches, joint and muscle pain or skin problems?

You might not have problems such as arthritis, cancer, diabetes, osteoporosis or stroke.. (Do check if your family has these problems)

If you've answered yes to any of them, you might wanna pay attention to what I'm telling you here.

(By the way, if your answer is "That's just growing old, buddy.", explain to me how some old men and women live up to 70-80+ years old, and still maintain such a healthy lifestyle!)

Did You Know The Water You're Drinking Right Now is the Cause of All Those Problems?

My name is Chao.

Did you know the water you're drinking now is slowly (and silently) damaging your body without you knowing it?

It can even lead to cancer and diseases in people. (There's multiple reports you can search online about how contaminants in the water can affect one's health.)

It's scary because the damage comes in slow increments over time, and when you reach a certain age, the full effect of it will be felt. Also, it completely depends on what you have been putting into your body!

So if you're below the age of 55, you still have a chance to get your body back to optimal, clean and healthy state before it's too late.

But if you're over 55, you need to act now.

Because there's a way to get your body back to its 100% optimal state, giving you back the youthfulness as if you're in your 20's!

The information here today might even save someone's life!

Clean Water Is Extremely Important To Us. But Is The Water You're Drinking SAFE?

Recent analysis of municipal drinking water (or tap water) has shown that, *despite* government regulations, there are still many dangerous contaminants present in our water.

In fact, these facilities often *contribute* to the problem!

How is this possible?

What happens in these facilities is they add dangerous chemicals to the water as part of the treatment process.

These chemicals include **fluoride and chlorine**. (I'll tell you how dangerous they are in a few moments.. you won't believe it.)

The water regulations and treatment methods used in the U.S are old and outdated and do little to address the number of very toxic chemicals that are already in our water!

The Safe Drinking Water Act only regulates 91 potential water contaminants, yet **more than 60,000 chemicals are used within the U.S**, many of which have been identified as probably carcinogens (a substance capable of causing cancer in living tissue)!

It's estimated there are now more than 2,100 known chemical toxins present in U.S tap water.

And to make it worse, many facilities transport their water in antiquated, corroded pipes, which may leach toxic heavy metals into the water AFTER it has been treated.

What Exactly Is In The Tap Water?

A quick research online about the truth of tap water will tell you what I'm saying here is true, and you SHOULD be concerned..

Here are 7 of the more dangerous chemicals found in your tap water:

1. Fluoride

Research has shown that fluoride, **a chemical used in rat poison**, is being used in tap water and it has been proven to damage tooth enamel. The alarming news is that for over 50 years, the U.S government has mandated that fluoride is to be added to the water supply to prevent dental problems! *What?!*

Not only that it has been proven to cause more harm than good to your dental health, it can also increase fracture risk, suppress immune and thyroid functions.

It also increases cancer risk and disrupts the function of the pineal gland.

The pineal gland is responsible for secreting melatonin, the primary hormone that controls your sleepiness and wakefulness.

And if you're into spirituality, it's your 'third eye'.

2. Chlorine

Chlorine is used in water treatment facilities as disinfectant. Although it can effectively kill micro-organisms, it has toxic effects on the human body.

Chlorine has been identified as a leading cause of bladder cancer and also have been associated with rectal and breast cancers, asthma, birth defects and premature aging of skin.

And it's common knowledge that chlorine is being used to clean swimming pools of bacteria! (You know chlorine is present when your eyes are red after a swim!)

3. Radioactive contaminants

I believe you have heard of the radioactive fallout from Japan. It has been detected these dangerous fallouts are in the U.S drinking water supply!

It's reported that 13 U.S cities have been detected to contain the radioactive iodine-131 in their water supply system.

Some cities were detected to have low levels of radioactive cesium and tellurium isotopes. (This data can be viewed at EPA's website.)

4. Pharmaceutical drugs

Investigations have alarmingly shown an increasing number of pharmaceutical drugs are finding their way into our drinking water supplies.

Drugs ranging from antibiotics, birth control pills, painkillers, antidepressants and other dangerously psychiatric medications are showing up in most municipal water supplies

5. Hexavalent chromium

Sounds dangerous right?

Because it is.

EWG (Environmental Working Group) revealed that hexavalent chromium is identified to be a chemical that is a 'probable carcinogen'. This is present in high concentrations in 31 U.S cities!

If you've watched the movie Erin Brockovitch, you might have heard of this chemical. The movie chronicled the case brought against Pacific Gas and Electric for contaminating the water in an area of Southern California and poisoning thousands of people.

Sadly, despite its known toxicity, there are no government regulations for hexavalent chromium in drinking water..

(You can read more here: <http://www.ewg.org/research/chromium6-in-tap-water/executive-summary>)

6. Lead, aluminium and other heavy metals

Water is transported via various means, including tanks and pipes.

However, lead and other heavy metals can make their way into your tap water through corrosion of the pipes in your plumbing system.

Lead consumption has been linked to severe developmental delays and learning disorders in children. Aluminium and other heavy metals have been linked to nerve, brain and kidney damage.

As of right now, some facilities still transport water in lead pipes!

7. Arsenic

This alone should be the reason for you to STOP drinking tap water right now. Arsenic is a poisonous element that is known to be *extremely* cancer-causing!

The Natural Resources Defence Council estimates that as many as 56 million Americans drink water that contains unsafe levels of arsenic! Visit the USGS website to check where and to what extent arsenic occurs in ground water across the U.S.

Ok, so maybe you can just stop drinking tap water then, but..

*What About Bottled Water?

If you think that bottled water are safer than tap water, what I'm about to tell you might surprise you..

First, we need to understand how water is regulated.

It's important to know that water is being regulated by different agencies, but with different missions.

The U.S Environmental Protection Agency oversees the quality of water that comes out of your tap, while the U.S Food and Drug Administration (F.D.A) is responsible for ensuring the safety and truthful labelling of bottled water that are sold nationally.

Now here's the kicker:

Although states are responsible for regulating the water (both packaged and sold) within its borders, *one in five states doesn't even bother at all!*

An important fact to note is that the federal government does *not* require bottle water to be safer than tap! (Actually the opposite is true in many cases)

Tap water in most big cities must be disinfected, filtered to remove pathogens, tested for cryptosporidium and giardia viruses.

Bottled water does not have to be!

After a four-year review of the bottled-water industry and its safety standards, NRDC concluded that there is NO assurance that bottled water is cleaner or safer than tap water.

In fact, it's estimated that 25% or more of bottled water is really just tap water packaged in a pretty bottle, sometimes further treated, sometimes not.

About 22% of brands of bottled water that are tested contained chemicals at levels above state health limits!

You are literally drinking poison!

If consumed for long periods, those contaminants you are putting into your body could cause cancer or other health problems for people with weakened immune systems.

You can read more about this at NRDC's website.

Another interesting fact to take note is about the actual bottle itself.

Chemicals called phthalates (known to disrupt testosterone and other hormones) can leach into bottled water over time.

One study found that water that had been stored for 10 weeks in plastic and in glass bottles containing phthalates, suggested that the chemicals could be coming from the plastic cap or liner.

Although there are regulatory standards limiting phthalates in tap, there are no legal limits in bottled water; the bottled-water industry waged a successful campaign opposing the FDA proposal to set a legal limit for these chemicals.

Often times, we can't avoid having to buy bottled water. So to ensure that you are buying the 'cleanest' one, check the label or the cap.

If it says "from a municipal source" or "from a community water system", this just means you're paying extra to own a nicely designed bottle that contains tap water.

If there's no information on the bottle, call the number where the bottle was packaged and ask about the source.

But you might want to avoid buying bottled water as much as possible..

Did you know how your favourite "healthy & natural, from the mountains" bottled water get to your friendly neighbourhood stores in the first place?

To put it very briefly, companies collect the water from Mother Nature, up in the mountains, fresh as it can possibly be.

Then they'll bottle it up and transport them in cases.

These cases might be placed under the hot sun on the tarmac while waiting to be transported.

You don't even know how long they will sit out under the sun or in the back of a trailer..

Maybe 2 days or 2 weeks.. just waiting for transport to arrive or to be moved somewhere else.

And bottled water that has been sitting under the hot sun is *very* dangerous!

The heat from the sun will react with the chemicals in the plastic of the bottle which will release dioxin into the water.

Dioxin is a toxin commonly found in breast cancer tissues!

(For further reading on this topic, read here: <http://livefreelivenatural.com/do-not-leave-bottled-water-in-the-sun/>)

For the environmentally concerned readers, there are news articles that have reported that in the ocean, around 300 feet deep, enormous piles of trash have been uncovered.

Most of these are plastic bottles.

Plastic, bottled water!

If I were you, I would stop buying bottled water completely!

Okay, tap water out, bottle water out..

*“Someone Told Me About Reverse Osmosis Water..”

For those who have not heard of reverse osmosis water, let me explain what it is.

Reverse osmosis is a process where dissolved inorganic solids (such as salts) are removed from the water. This is accomplished by pushing the water out of your tap through a semi-permeable membrane.

The membrane, which also includes addition filters such as sediment or carbon filters, will filter out impurities in the water and will be flushed down the drain.

This filtering process is effective in areas that do not receive municipally treated water and is commonly used in bottled water facilities.

However, the problem with this process is that dangerous chemicals such as pesticides, herbicides, chlorine or any chemicals that are molecularly smaller than water can pass *freely* through the filter!

You're drinking things that will directly damage your body!

Also, reverse osmosis process actually *removes* healthy, naturally occurring water minerals! These minerals not only provide good taste, they are also important in serving a vital function in our body systems!

Many bottled water manufacturers use either the reverse osmosis process or distillation to process their water. Both these purification processes result in what is commonly known as "dead water".

Because everything that is good for your body, like calcium, magnesium and potassium, has been removed!

Do You Know Exactly How Important Water Is?

Our body contains approximately 72% water, we're basically walking bags of liquid.

Just by drinking water, you can prevent heart attacks, boost your brain power, helps you lose weight and even keeps you alert.

In fact, water is so important that a mere 2% drop of water in our body's water supply can trigger various signs of dehydration and health problems.

Problems such as having fuzzy short-term memory, trouble with basic math or difficulty focusing on small print (like on a computer screen).

(It's been estimated that 75% of Americans have mild, chronic dehydration! Quite a worrying statistic for a developed country where water is readily available!)

Water also regulates our body temperature.

Our bodies control over-heating by making us sweat and perspire, and through evaporation it gives us a cooling effect.

In a cold environment, the skin maintains proper body temperature by shunting the blood away from the exterior surface thereby conserving heat within the body.

Blood plasma in our body is made up of 92% water.

The movement of water within our cellular systems transports these vital plasmas to various parts of our body system. Blood plasma plays a *critical role* in circulating antibodies from the immune system!

Water is one of life's essentials and it's no exaggeration to say that water is "**The Basis of Vitality and Long, Healthy Life**".

Unfortunately, It Is Often Neglected and Overlooked

Many of the delicious and tasty beverages we choose to drink instead of water come with many unwanted substances that are doing more harm to our body than good, namely **sugar and caffeine**.

They might give us a temporary boost but this 'boost' will slowly accumulate and their corrosive acid levels are actually detrimental to our health!

They don't really satisfy our thirst and actually make us feel more fatigued and dehydrated.

These bad habits will slowly take a toll on our health, piling the 'junk' slowly in our body and reducing our effectiveness.

So for those who needs to function by drinking RedBulls or coffee, you're putting your own health in danger..

Do you notice how tired and dehydrated you've become after a few hours of drinking those drinks?

You feel like your body just 'crashed'..

Those drinks only give you a temporary boost but the chemicals and substances in them are the ones you got to watch out for!

The high amount of sugar in those drinks (or any soft drinks) causes your pancreas to produce an abundance of insulin, which leads to a "sugar crash".

Chronic elevation and depletion of sugar and insulin can lead to diabetes and other imbalance related diseases.

This is particularly disruptive to growing children which can lead to life-long health problems!

What You're Drinking Is Making You Sick!

And not forgetting to mention that soft drinks are extremely acidic.

So much so they can eat through the liner of an aluminium can and leech aluminium from the can if it sits on the shelf for too long.

Alzheimer patients ALL have high levels of aluminium in their brains. Heavy metals in the body can lead to many neurological and other diseases!

The human body naturally exists at a pH (potential hydrogen) of about 7.0. Soft drinks have a pH of about 2.5..

Which means you are putting something into your body that is hundreds of thousands of times more acidic that your body is!

Diseases flourish in an acidic environment.

The lower the body pH level is, the easier it is for you to get sick.

Basically, why we get so unhealthy, why our bodies are degenerating over time, is because we are screwing our pH level of our body.

If you, or anyone you know is constantly sick, or always complain about their health, ask them what they have been drinking and eating.

A Proper pH Level Is a *Crucial* Aspect To Our Health!

Many doctors stressed the importance of pH because a balanced pH in our body protects us ***from the inside out!***

Your blood pH level should never stray from 6 and 7.5.

Optimally, 7.365 is the level of pH what we want. (*The lower the number, the more acidic it is. The higher the number, the more alkaline it is.*)

**Diseases, cancer cells and many other sicknesses cannot take root
in a body whose pH is in balance.**

An imbalance of acidity and alkalinity will allow unhealthy organisms to flourish, damage tissues and organs, and compromises your body's immune system.

Research shows unless the body's pH level is slightly alkaline, the body cannot heal itself.

So if you or your family are having health problems, it's most likely their body are too acidic.

**Total healing of chronic illness only takes place when and if the blood is restored to a
normal, slightly alkaline pH.**

An imbalance in your body's pH may lead to serious health concerns such as:

- Hormone concerns
- Cardiovascular weakness
- Weight gain/loss
- Bladder and kidney concerns.
- Immune deficiency
- Acceleration of free radical damage.
- Structural system weakness, including brittle bones, hip fractures and joint discomfort
- Stressed liver function
- Low energy
- Slow digestion and elimination
- Yeast/fungal overgrowth.
- Tumor growth

An acidic balance will:

- decrease the body's ability to absorb minerals and other nutrient..
- decrease the energy production in the cells..
- decrease its ability to repair damaged cells..
- decrease its ability to detoxify heavy metals..
- make tumor cells thrive..
- and make it more susceptible to fatigue and illness.

By now, you've understood how important maintaining your body's pH system is and how various drinks in the market can create havoc to your health.

What's Destroying Your Body's Effectiveness And Making You Sick

In 1923, Dr Otto Heinrich Warburg discovered the cause of cancer.

He found that **cancer grows in oxygen-deprived acidic tissue** and when our body is in an alkaline state, disease and sickness cannot thrive in it.

What does "oxygen-deprived" mean?

Oxygen-deprived means when living tissue is stripped of oxygen after a process called 'oxidation'. To put it simply, if your body is in oxidation, cell membranes including cellular proteins, lipids and DNA in your body will be damaged.

Picture an apple that's been left out in the open for a while. It will slowly turn to brown. This is what oxidation is.

It's how cancer and sickness are formed when your body is oxygen-deprived.

So what's destroying your body?

It's years of eating bad food and drinking soft drinks!

They'll slowly add up in your body, making it acidic, and causing you to have an oxygen-deprived body system..

..and making you sick easily.

The level of toxins, or how bad your body's acidity is, largely depends on your age and how healthy you have been.

All of those chemicals in the drinks are causing you and your family various health problems that are difficult to cure once the body have reached critical levels!

But there is hope! You *can* get your health back!

The way to get your body system back to its optimal, healthy state is to reduce acidity in your body and get the pH level to a balanced level.

“The first steps in maintaining health is to alkalize the body (pH or acid/alkaline balance).. Change in pH alters virtually all body functions.” – states Arthur C. Guyton, M.D – probably the most recognized author on human physiology – in his “Textbook of Medical Physiology”, which is used in virtually all US medical schools.

You need to reverse this process as soon as possible!

*The Mysterious “Miracle Healing Water”

Since the 1950’s, scientists have been researching the locals at locations such as Lourdes, France; Nordenau, Germany; Nadana, India and Tlacote, Mexico.

It was known that the locals there seem to live an abnormally long, healthy life with little or no health complications.

Soon they found out the locals are talking about a certain ‘miracle water’ they’ve been drinking.

People suffering from all kinds of illnesses travelled far to treat themselves with this “Miracle Water”.

Miraculously, many of them reported experiencing being healed after drinking the water!

Samples were taken and it was discovered the “Miracle Healing Water” from all those places have one thing in common – an abundance of active hydrogen.

Which today is currently known as **hydrogen water** or **alkalized water**.

The water that our body truly needs to return to its full, functioning, 100% optimal healthy state!

Enagic & The Mighty K8

Enagic, a Japanese company who’s a leading manufacturer of specialized, high-quality water ionizer generating system that has been around for over 4 decades, has successfully been reproducing this “Miracle Healing Water” with a device they call **Kangen8**.

This device is currently being used in hundreds of thousands of homes worldwide to transform regular, unclean tap water into pure, healthy “Miracle Water”!

Enagic is the ONLY ionizer manufacturer in the world with the coveted Gold Seal certification from the world-known WQA (Water Quality Association) – one of the oldest and most prestigious international not-for-profit trade associations in the world!

(The Gold Seal is a highly distinguished award only given to the most reliable and trusted producers of quality drinking water)

Enagic machines are approved “medical device” by the Japanese Ministry of Health & Welfare, and a few of the many hospitals in Japan are currently using this technology, such as:

- Kyowa Hospital
- Kitari Institute Medical Center
- Showa University Hospital
- Kanto Teishin Hospital
- Meiseki Hospital
- Nara College of Medicine Hospital
- Iida Hospital
- Tokyo Women’s College of Medicine Hospital
- Hanabatake Hospital

Kangen Water Helped My Mom Get Back To Her Optimal Health!

My mom’s a hard worker.

She worked tirelessly night and day so she can create a brighter and better future for me and my sister.

She loves us that much and providing for us was her number 1 priority..

Unfortunately, it was her downfall.

She neglected her health due to working endlessly and over the years she accumulate multiple health issues like high blood pressure, diabetes, high cholesterol, clogged arteries..

And then that unforgettable heart attack happened.

After 6 months of drinking Kangen Water, I can physically see that her health has improved.

Her energy was back, her glow was radiating and she's happier than ever.

The best part?

After she went for a blood check-up, her doctor was astonished her blood is clean as a whistle!

On top of that, she's able to donate blood for the first time in 30 years!

The Kangen8, with its alkaline water, is able to re-balance your body's pH system so that it will *stay* in balance, *removes* toxins from your body and put us back on track to our youthful, energetic state with a powerful immune system to boot!

*How KangenWater Helped Improved My Mom's Health!

It would require me to become a scientist to explain how KangenWater is produced!

So I'd like to present this video of Bob Gridelli & Elvis Stojko showing you the powers of the KangenWater.

INSERT VIDEO

Please Get Me My KangenWater! (button)

Anti-Oxidation Powers

KangenWater is produced through a process called Electrolysis – where electric current is passed through the water to separate water into oxygen (positive ions) and hydrogen gas (negative ions).

Because of how it's produced, Kangen Water has a very high negative ORP (oxidation reduction potential), making it more effective to reduce the oxidative stress in your body.

Kangen Water has the highest antioxidant measured compared to any liquid on the planet, which means sickness and cancer cells will have a very a hard time to develop in your body if taken regularly!

Restructured Water

All liquids have a 'surface tension' and normal water is usually in clusters of 15-20 H₂O molecules, with 75-95 dynes (a unit of measurement) of surface tension.

To understand surface tension; have you ever watched a water bug 'walk' across a pond? This is because the water has a surface tension that allows the bug to walk on water.

Kangen's ionized alkaline water is restructured to have only 4-6 H₂O molecules and with only 45 dynes of surface tension.

Because of these two aspects of KangenWater, it allows for the increase absorption of nutrients through the gut and by the cells.

This restructuring means it allows cells in our body to absorb the water easily, quickly and more efficiently, and can literally 'bathe' your cells of its toxic wastes!

KangenWater will dramatically improve hydration and 'clean' the cells in your body!

Alkaline pH

Most waters in the world run between a pH of 6-7. Kangen's ionized alkaline water has a pH between 8.5 – 9.5.

This will **flush disease causing acid waste out of your body and raises the pH** from being too acidic and making you sick.

The most important thing you can do to your health is to raise your pH level to at least 7.2 and above.

Remember, the more alkaline your body is, the harder for you to get sick!

Free Hydrogen Electrons

If you have never heard of free-radicals, they are molecules with an impaired hydrogen electron and they are the cause of cancer, they destroy DNA cells, rapidly age you and just wrecking havoc inside your body.

KangenWater is ionized alkaline water, and it has millions of hydroxyl ions per glass.

What will happen is **those extra electrons will attach to any free-radical molecules throughout your body and effectively making them harmless!**

Ionized alkaline water is the most effective free-radical scavenger in existence, more effective than Vitamin C, pine bark extract or any other antioxidant known to man!

Hydrogen Bonding

Water is either structured or unstructured, which establishes whether the Hydrogen atoms connect the water molecules together or not, this is known as the Hydrogen Bond.

Structured water based on hydrogen bonding is integral to every cell in order to allow all the bio-chemical activities to be maintained at their highest level of function to support life.

Ionised alkaline water is the most structured water in existence!

Positive EMF Signature

Positive EMF Signature is the most overlooked property of water, yet it's the most important one.

Everything that water has been exposed to leaves an electromagnetic frequency signature. Negative (harmful) frequencies are always associated with cancer and other diseases, while positive (beneficial) ones are always associated with excellent health.

Dr Pawluk writes: "Water in the human body is mostly a "soup" of electrolytes, proteins, fats, and starches. Not only do magnetic fields affect the body's own water, but they also can have an effect on any drinking water. There is evidence that electromagnetic fields change the properties of solutions."

Water that has come in contact with chemicals, pollution, toxins or any other harmful substances will leave its signature or imprint on the water in the form of a vibrational frequency. This renders the water molecule itself to be harmless.

Ok, I've already told you how dirty, toxic and very unclean our water is.

Kangen ionized alkaline water 'wipes out' those harmful frequencies from the water, 'resetting' its memory, cleaning the water and making it pure and clean!

Benefits of what KangenWater can do for you:

- Release Stored Toxins
- Normalize Blood Pressure, Blood Sugar & Insulin
- Support Healthy Colon Function

- Relieve Asthma & Chronic Respiratory Infection
- Stop Abnormal Gastro-Intestinal Putrefaction
- Reduce Proliferation of Candida, Fungus & Undesirable Microforms
- Reduce Chronic Pain
- Improves Wound Healing
- Slows Down Aging Process
- Boosts Immunity
- Reduce Osteoporosis
- Reduce Body Fats

It's no surprise my mom got her health back!

Please Get Me My KangenWater! (buy button)

***What Else Can KangenWater Do?**

Not only can KangenWater improve your health, it can do a multitude of different things for your lifestyle and household!

The **Kangen8** has the ability to produce up to 7 types of KangenWater and you'll be amazed at what I'm about to share with you about the versatility that each of the 7 types can do!

You could spend a lifetime discovering all of the different and useful ways to incorporate all of them for your benefit!

*If you spend time to learn how to use the powers of KangenWater, you can save **up to \$50-\$200 on household supplies!***

KangenWater is literally your one-stop solution to healthy living!

The 7 Types of KangenWater

1) Strong Kangen Alkaline Water – 11.5pH – Stain Removal & Sanitising

This water has a very strong cleaning effect, plus dissolving and heat conducting benefits.

Food Preparation – Remove the rawness from your favourite vegetables such as green onions, bamboo, wasabi and flowering fern. Strong KangenWater have the power to clean all of the toxins (eg: pesticides) that might be stuck to your produce.

Cleaning – Strong KangenWater can be used to clean your cutting boards and dishcloths. It's great for cleaning oil and tough grime from vents, as well as for general cleaning in the kitchen!

Stain Removal – The extra strength and increased absorption power from Strong KangenWater will remove coffee, soy sauce and oil stains with ease! It's also great for removing stubborn toilet bowl stains.

Dishes – Use less detergent when washing your dishes! You can save on your water bills as you are using only 1/3 of the usual amount of water, because of how powerful KangenWater is!

NOTE: Strong KangenWater is NOT for drinking.

2) Kangen Water – 8.5pH / 9.0pH / 9.5pH – Maximum Hydration Anti-Oxidant

There are 3 types of selections available for KangenWater and this type is perfect for drinking and healthy cooking. It also works to restore your body to a more alkaline state, optimizing health for you and your family!

Drinking – Drink KangenWater everyday and soon you will see dramatic change in your life as you will get healthier and stronger. Unlike your usual tap water, KangenWater has no odor, tastes lighter and has a pleasantly sweet flavour!

Food Preparation – Use KangenWater to clean your vegetables and fish. KangenWater can enhance the flavour of broccoli, onions and more by pre-boiling them. With the enhanced flavour, you are able to use less condiments and salt!

Soups & Stews – KangenWater draws out the flavour of ingredients so they get tender and juicy. This means the food won't need so much seasoning and excess salt can be avoided!

Plants – KangenWater may give freshness and life to plants! The unique properties in the water stimulate germination and improve seedling development!

3) Neutral Water – 7.0pH – Baby Formulas & Medications

Free of chlorine, rust and cloudiness, Neutral KangenWater is delicious drinking water that is safe for preparing food for your baby and taking medications.

The cleanliness of Neutral KangenWater ensures you are not feeding your little ones unwanted substances that will affect their health, and when taken with medication, rest assured that your body will absorb all of its benefits!

4) Kangen BeautyWater – 5.5pH to 6.5pH – *Natural Astringent for Skin & Hair*

Kangen BeautyWater is a slightly acidic water recognized for its astringent effects. It's especially great for gentle cleaning, hygienic and beauty care, pet health and even keeping frozen food full of flavour.

Face Wash – The astringent properties of Kangen BeautyWater are effective in toning and firming your skin. Wet your face with Kangen BeautyWater, pat the skin and leave to dry. This water is also great to use as a toner after a shave.

Hair Care – Don't use a conditioner after you've shampooed your hair, use Kangen BeautyWater instead! It can reduce those annoying tangles and brings out a radiant shine to your hair. You can even put the Kangen BeautyWater in a spray bottle and use to spray your hair or face when you're out and about.

Polishing – The acidity of Kangen BeautyWater will give a beautiful high sheen when you use it to polish mirrors, eyeglasses, any glass objects and windows.

Frozen Food – Spray foods with Kangen BeautyWater when freezing so that the food does not lose its flavour when thawed out. Can be used on fish and shrimps too.

NOTE: Kangen BeautyWater is NOT for drinking.

5) Strong Kangen Acidic Water – 2.5pH – *Kill Germs, Mould & Bacteria*

Strong Kangen Acidic Water has powerful disinfecting properties. Use this water to sanitize kitchen utensils and counter tops. It also can be used as a hand sanitizer or other common sanitizing needs.

Cleaning & Disinfecting – Sanitize knives, cutting boards, dishtowels, kitchen cloths and more with Strong Kangen Acidic Water. Use this water to clean and disinfect areas around the kitchen and cooking areas, which can be a breeding ground for germs.

Hygiene – Strong Kangen Acidic Water can be used to disinfect your hands, your toothbrush or used as a mouthwash! Put this water in a spray bottle for easy access and application.

Commercial Operation - Strong Kangen Acidic Water can greatly benefit places such as beauty salons, hair salons, restaurants, agriculture colleges, day care centres, pet shops, nursing homes and anywhere else that needs a proper, clean environment.

Please Get Me My KangenWater! (buy button)

KangenWater Is The Best Addition To Your Home and Life

KangenWater has proved itself to be the best water you can have in your household, providing a multitude of benefits for you and your family's health and well-being.

With such a myriad of miraculous and powerful properties in the water, you can be assured that your health will be well taken care of if you were to make KangenWater a part of your daily lifestyle.

With benefits such as:

- Improving your quality of water
- Improving your body's immune system
- Improving your health, or someone you care for
- Ridding your body of unwanted substances that you've been accumulating
- Raises your body's pH level to a better, healthier level
- Alkalize your body's system so sickness & cancer is difficult to form in you
- Cleaning your body's cells with powerful and unique properties
- Putting your energy and youthfulness back in you
- Improving the quality of food you eat
- Improving the complexion of your face and shine of your hair
- PLUS: Able to replace your normal household items, saving you money
- ..and many, many other benefits!

If you're ready to include KangenWater in your life right now and take advantage of its powers, click the button below!

Please Get Me My KangenWater!

Get your failing health back on track!

After clicking the button above, you'll be directed to a form that you'll need to fill up. We'll get on a Skype call on the time you've chosen and we will discuss how best to get you your Kangen Water System.

On the call, you can ask me anything you want about KangenWater system.

Remember, the health of your loved ones should be priority. Every day, we subject our own health to dangers. Most of them unknown!

There's almost no way to stop it from happening. We can only take steps to reduce the damage we've done to our own body.

I personally believe that Kangen is that one important step. After all, it has improved my mom's health from a very lethal heart attack!

Make the right choice for your loved ones!

Chat with you soon.

Sincerely,

Chao Chien
